

THE INTERNATIONAL REC STANDARD

Empowering Electricity Purchasers

MEMO

To: Stakeholders
From: The I-REC Standard secretariat
Date: October 2018
Subject: Participant contact list

The I-REC Standard is a list of rules, regulations and best practices which are to be used by attribute tracking systems. These rules, regulations and best practices together combine to form the I-REC Code. The I-REC Code provides the blueprints for a standardized attribute tracking system that can be implemented in any country or region. Standardization allows for reliable consumer claims through the elimination of double claiming, double counting and double certificate issuance.

The I-REC Standard allows market players, individuals or organisations the opportunity to open trade and redemption accounts on the I-REC Standard registry in order to receive, purchase, trade and redeem I-REC certificates for themselves or their clients. Organizations with these accounts are referred to as participants.

The following participants have authorized the I-REC Standard secretariat the ability to publically disclose their contact information and contact persons. The information provided is up-to-date as of 17 October 2018:
